Session Title	Session Description	Product	Track	Module
Crosswalks and F-series Reporting	Review how to crosswalk account codes and produce financial state report extracts, such as the F-195 and F-196.	Qmlativ	Financial Management	Account Management
Purchase Order Process	This session will include an overview of entering purchasing requisitions and processing them through the system, a brief discussion on Requisition and PO Group setup, demonstration on entering and approving requisitions, batch to open purchase order processing, and receiving on purchase orders.	Qmlativ	Financial Management	Accounts Payable
Managing Expense Reimbursements	In this session you will see how an Expense Reimbursement flows through the system from entry to payment. We will also explore the available configuration options, and see how these options impact the entry process.	Qmlativ	Financial Management	Accounts Payable
Payment Card Processing	This session will provide a review of credit card processing in Qmlativ.	Qmlativ	Financial Management	Accounts Payable
AP Invoice Entry and Processing	This session will provide a review of AP invoice entry, approval, and processing in Qmlativ.	Qmlativ	Financial Management	Accounts Payable
AP Corrections	In this session, we'll explore selective scenarios in managing invoices and payment processing. We'll discuss when to void and when to reprint warrants. We will also discuss the process for adjusting Open-status invoices.	Qmlativ	Financial Management	Accounts Payable
Asset Management	In this session, you'll see how to add and track buildings and equipment.	Qmlativ	Financial Management	Assets
Budgeting Overview	During this session, you'll see how to develop the non-personnel budget in Qmlativ.	Qmlativ	Financial Management	Budgeting
Qmlativ Introduction for Business Office Personnel	This session will provide an introduction of common features from a Business Office perspective, and will provide an overview of the Financial Management modules and flow.	Qmlativ	Financial Management	Introduction
Employee Access Setup and Usage	In this session, you will become familiar with the options to configure Employee Access, including the integration of user-initiated Online Forms.	Qmlativ	HR	Human Resources
Introduction to Human Resources (Overview)	For districts not yet using Qmlativ, this session will provide an overview of the steps to bring on a new employee. This will include user access, Employee Access, adding them to positions, setting up their assignments, and preparing their data to be processed by payroll.	Qmlativ	HR	Human Resources
Time Off	In this session, you'll become familiar with Qmlativ's Time-Off module as we demonstrate setup and operations, including its interaction with payroll processing.	Qmlativ	HR	Human Resources, Payroll
HR/Payroll State Reporting	This session will include a review and demonstration of available State Reports in Qmlativ (New Hire Submission, PFMLA, Quarterly Wage, S-275 and SEBB).	Qmlativ	HR	Human Resources, Payroll
Deductions & Benefits	In this session, we will walk through Deduction and Benefit Code setup, Ded/Ben verification features, Ded/Ben max configuration, the creation of Ded/Ben sets, and mass processing utilities.	Qmlativ	HR	Human Resources, Payroll
Understanding Positions and Assignments	In this session, we'll explore Qmlativ's Position and Assignment design. You'll become familiar with how this design impacts payroll and other functions.	Qmlativ	HR	Human Resources, Payroll
Online Forms	In this session you will see the power Online Forms provides for a district. Learn how to create, clone, export, and import Online Forms. Review how various users will interact with the Online Form features, and see examples of forms you can take back to your districts to use right away.	Qmlativ	HR	Online Forms
Payroll Processing - Tips & Tricks	In this session, we will discuss features designed to make processing payroll easier. These features include: defaults, utilities, some helpful views, and tips.	Qmlativ	HR	Payroll
Hourly Pay Timesheets	In this session, we'll explore Qmlativ's Timesheet Groups, Timesheet Sets and Timesheets. You'll become familiar with the different ways to process hourly pay for your employees.	Qmlativ	HR	Payroll
Introduction to Payroll (Overview)	For districts not yet using Qmlativ, this session will provide an overview of the payroll process from start to finish and will outline some differences between SMS 2.0 and Qmlativ payroll processes	Qmlativ	HR	Payroll
Payroll Corrections	In this session you'll learn about which payroll scenarios require a payroll purge, payroll reset, or just a re-calculation. Additionally, we'll cover how to make some common payroll corrections "on the fly."	Qmlativ	HR	Payroll
Qmlativ Payroll Encumbrance	Payroll Encumbrance in Qmlativ is conceptually different than in SMS 2.0. In this session, we will discuss setup and configuration, how and when to run the encumbrance process, and what to do at Fiscal Year End. We will also review calculation logic.	Qmlativ	HR	Payroll
Staff Planning Overview	In this session, you will become familiar with Staff Planning and the tools you will use for Budget development.	Qmlativ	HR	Staff Planning
The Power of Qmlativ	A strong foundation and understanding can unlock additional power and strength. This session will focus on building your Qmlativ foundational knowledge to empower you as a user. Gain an understanding of relational databases, reporting outside a report, tips and tricks to selecting fields to display, advanced filtering, standard prompts and filters, and take a look at the Customization module.	Qmlativ	Hybrid	Cross Product

Custom Screens in Customization	In this session we will introduce how Custom Forms and UDF fields migrate into Qmlativ and how to view the data within those fields by creating Custom Screens.	Qmlativ	Hybrid	Cross Product
Qmlativ General Navigation - Tips & Tricks	This is an introduction to Qmlativ standard features for all skill and experience levels. Come learn how to set Filters, create Browse Views, build Live Tiles, Dock favorite screens, set themes, adjust screen size, and more.	Qmlativ	Hybrid	Cross Product
Knowledge Hub Overview	This session will provide an overview of the tremendous resources available within the Skyward Knowledge Hub. This will include how to use the Professional Development Center, how to effectively search for solutions within the Skyward Help Center, and how to benefit from the knowledge of the Skyward Community.	Qmlativ	Hybrid	Knowledge Hub
Qmlativ Reporting - Tips & Tricks	This session will cover Prompt Templates, Scheduled Reports, and Quick Reports.	Qmlativ	Hybrid	Reporting
Security Fundamentals	Learn about the fundamentals of Qmlativ Security. See the potential in improving your district's Security accuracy and management.	Qmlativ	Hybrid	Security
Browse Views, Filters, and "More"	In this session, you will see how to tailor Qmlativ to meet your navigational and analytical preferences. We'll demonstrate how to set Views and Filters, as well as create Tiles and Charts on your personal homepage.	Qmlativ	Hybrid	Finance, Human Resources, Payroll
Managing Attendance	Do you work in the front office and manage student attendance? Did you just migrate to Qmlativ and are wondering how to perform your daily tasks in the new software? Come to this session to learn the ins and outs of maintaining Attendance Records for your school.	Qmlativ	Student	Attendance
Data Mining - Student Management	You loved it in SMS 2.0 and you're going to love it even more in Qmlativ. Join us in this session to see how easy it is to create simple Student Management Reports using Data Mining in Qmlativ.	Qmlativ	Student	Data Mining
End of Term Grading Tasks	There's more to the end of a term than Report Cards. This session will focus on processes you need to confirm are in place for a successful end of term, such as ensuring teachers can post grades and run validation reports.	Qmlativ	Student	Grading
Message Center & Auto Email Notifications	During this session I'll show you how to use Message Center to communicate with your students and their guardians, create a message, including posting and sending options, visualize how messages appear in Family/Student Access, and how to configure automated emails.	Qmlativ	Student	Message Center
Multi-Tiered System of Supports	MTSS (Multi-Tiered System of Supports) has a ton of flexibility for tracking students. In this session we'll take a look at how districts can use Watchlists, Observations, Referrals, and/or Intervention Plans to improve student success.	Qmlativ	Student	MTSS
Qmlativ Online Forms & New Student Enrollment	Creating Online Forms for families and staff has never been easier. Join us to see how to create forms for a variety of purposes, including New Student Enrollment, Lunch Surveys, and Student Emergency Updates. Once your forms have been created, see how administrative staff maintain the submitted data.	Qmlativ	Student	Online Forms, New Student Enrollment
Introduction to Qmlativ - Student Management	This session is a "first look" at basic navigation and functionality in Qmlativ for those who work primarily within the Student Management modules. We'll familiarize you with the look and feel of Qmlativ, with a focus on list screens in selected Student Management modules as well as the Student Profile.	Qmlativ	Student	Qmlativ
Current Year Schedule Changes	It's inevitable: students move in and out of classes all the time. What's the most efficient way to do schedule changes? The answer may be different in each scenario. This session will show you all the different methods available to you in the Scheduling module to make schedule changes a breeze in Qmlativ.	Qmlativ	Student	Scheduling
Future Scheduling - Building a Master Schedule	You've collected student Course Requests in Qmlativ for next year; now what? In this session we will focus on using the requests and scheduling tools in Qmlativ to build a Master Schedule.	Qmlativ	Student	Scheduling
Future Scheduling - Scheduling Students	In this session we will review the tools you can use to Schedule Students in Qmlativ. This session will cover: the Mass Student Scheduler, Mass Add from a Section Roster, and the Mass Add Requests or Sections Utility. We will review how to unschedule students and identify other tools that may be helpful when working with Student Schedules.	Qmlativ	Student	Scheduling
Breezing through P223H Special Education Enrollment Reporting	This session will cover the different Qmlativ P-223H processes used to generate your monthly Special Education Enrollment counts, including extracting data, reviewing exceptions, and submitting your file to OSPI. Come learn how the P-223H in Qmlativ will save you time, provide ease of use and efficiency across the district, and generate all electronic files, including summary, audit, and exception data.	Qmlativ	Student	Special Education
State Reporting Overview	In this session we will share the basics of State Reporting in Qmlativ (Overview, Extract vs. Export, Hyperlinked Data).	Qmlativ	Student	State Reporting
P223 Enrollment Reporting	This session will cover the different Qmlativ P-223 processes that you will use to generate your Enrollment data counts, including extracting data, reviewing exceptions, and submitting your file to OSPI. Come learn how the P-223 in Qmlativ will save you time, provide ease of use and efficiency across the district, and generate all electronic files, including summary, audit, and exception data.	Qmlativ	Student	State Reporting
Teacher Access	Maybe you're a teacher, or maybe you're the first person teachers go to when they have a question. Either way, you need to know all about how teachers use their Gradebook, take attendance, submit Discipline Referrals, and look up student information. This session is tailor-made for you as we look at Teacher Access in Qmlativ from a teacher's perspective.	Qmlativ	Student	Teacher Access

Session	Description	Platform	Category	Subcategory
Preparing for Qmlativ Migration (Q/A)	This Qmlativ Student migration Q&A will be discussion based. We will provide helpful tips on cleanup to prepare for migration from SMS 2.0 to Qmlativ, and suggest trainings to offer for a successful migration.	Qmlativ	Student	
CEDARS Reengagement Program Reporting to OSPI	In this session presented by OSPI and WSIPC, you will learn how data should be reported to CEDARS for students participating in a 1418 Open Doors Youth Reengagement Program. We will also discuss why a student who was intended to be reported as participating, may not have been and what you can do to troubleshoot these issues. You'll be shown tools in EDS/CEDARS to verify students participating, and how to enter data in Skyward's software to ensure a student is reported in CEDARS as intended.	Qmlativ & SMS 2.0	Student	CEDARS
CEDARS English Language Learners Reporting to OSPI	This session will cover the "why" and "how to" of identifying, documenting, and submitting data for English Learner students in your districts. We will discuss the Home Language Survey, the program data that is entered into Skyward, the data that is submitted to CEDARS, and how the student level data is populated to the TIDE – ELPA 21 Test Platform.	Qmlativ & SMS 2.0	Student	CEDARS
CEDARS Restraint & Isolation Data to OSPI	In this session we will chat about the requirements to capture Restraint or Isolation student-level data for every student involved in an incident. We will show how and where the data is entered in Skyward and which of that data is submitted to CEDARS. Additionally, we will discuss the detailed definitions of both Restraint & Isolation, frequently asked questions, and what the reporting expectations are if an action/incident is both a Discipline and a Restraint or Isolation incident.	Qmlativ & SMS 2.0	Student	CEDARS
CEDARS Discipline Reporting	This session will familiarize you with the Qmlativ fields used in CEDARS Reporting and also an overview of CEDARS logic used to determine when a Discipline incident is included. Discussion and scenarios will be used to help demonstrate data entry and its impact on CEDARS Discipline Reporting.	Qmlativ & SMS 2.0	Student	Discipline
Tools for Managing Remote Students and Employees	Working and learning remotely is now a common occurrence. Join us as we highlight HR-Payroll and Student features in both SMS 2.0 and Qmlativ that can help make your experience managing employees and students in a virtual world a little bit easier.	Qmlativ & SMS 2.0	Hybrid	Other
Golden Ticket Not Required	Did you know that your school automatically has access to e~Funds for Schools, the Best-In-Class payment provider for schools and organizations? Simply request that EFS be turned on and start providing touch free payment solutions across multiple payment platforms (Online, Mobile, and In-Person) at no cost to your district. Learn how e~Funds for Schools moves your district closer to a cash free environment, providing better financial tracking and controls. You can also establish Donation and Fundraising campaigns that net higher than 96% profit revenues. Non-contact Event Ticketing is scheduled for release in spring of 2021. EFS is easily implemented and flexible for all school-related fees, events, and activities. When the time comes, the integration transition from Skyward's SMS 2.0 to Qmlativ is quick, simple, and has no upgrade costs.	Qmlativ & SMS 2.0	Sponsored Session	
Payroll Accounting	In this session, we will walk through a simple payroll run to discover the different data elements that drive accounting.	SMS 2.0	Financial Management	Account Management
Accounts Payable - Adjustments and Corrections	Districts often need to adjust and correct AP Records. In this session, you'll learn a recommended way to adjust, void, and reissue AP-related invoices and payments.	SMS 2.0	Financial Management	Accounts Payable
Credit Card Processing - Features and Highlights	This session will introduce you to the SMS 2.0 Credit Card module and will explore beneficial features.	SMS 2.0	Financial Management	Accounts Payable, Credit Cards
Budgetary Data Mining - Expenditure and Revenue Reports	In this session we will explore the Revenue/Expenditure Reports most often created for school staff. Different examples will be presented to assist the user with the creation of reports that have the information needed in an easy to read format.	SMS 2.0	Financial Management	Financial Management Student
Approving Requisitions	This session will explore the different ways to assign approvers to requisitions, such as account code selection. You'll hear about the interaction between the different approval methods, as well as tips on implementation, such as using the Home screen widget.	SMS 2.0	Financial Management	Purchasing
Expediting Order Submissions	In this session, we'll explore emailing POs and sending orders electronically to vendors' fulfillment systems (eCommerce). You'll see key configurations and we'll discuss implementation considerations.	SMS 2.0	Financial Management	Purchasing
Pay Records - Tips & Tricks	In this session, we'll explore the use of Add Ons, Additional Pay Codes, and other management tips in SMS 2.0. We'll also highlight how current Pay Record management efforts will help with the migration process.	SMS 2.0	HR	Human Resources
Managing Payroll Contracts, Assignment Changes, and Ending Employment	There are times when it's necessary to adjust employee Assignments and contract pays, or terminate an employee in your Qmlativ database. In this session, you'll learn about contract pay setup options and how to review contract and Assignment details to confirm contract statuses.	SMS 2.0	HR	Human Resources, Payroll
Get the Most Out of Employee Access	This session will show you how to get the most out of Employee Access by looking beyond the basics with an overview of features you may not be using. We will take a look at the Electronic W2 and 1095 forms, Employee Letters, Professional Development, Expense Reimbursement, Request Change options, Online Forms, Check Estimator, and Time Off options.	SMS 2.0	HR / Payroll	Employee Management
Ending Employment	There are times when it's necessary to terminate an employee in your database. This session will focus on the steps required to properly terminate an employee, including the special process required in managing the death of an employee. We will focus on these key points: changes to payroll data before final payroll, changes to payroll data after final payroll, special circumstances, deceased employee, retirement, and issuing settlement payments.	SMS 2.0	HR / Payroll	Employee Management

Managing Payroll Contracts	In this session, you'll learn how to use the utilities and processes available to mass update contracts. These utilities include options to mass update Retro or Dock Pay Codes associated with contracts, mass change paid/work dates on contracts, and set up contract defaults.	SMS 2.0	HR / Payroll	Human Resources, Payroll
Fundamentals of Position Assignment Migration to Qmlativ	In this session, we'll explore the Assignment/Contract/Pay Record relationship in SMS 2.0 and discuss the way Qmlativ HR and Payroll Records are created during migration.	SMS 2.0	HR / Payroll	Human Resources, Payroll
Payroll Fiscal Year End - Tips & Tricks	In this session, we will discuss features designed to make the Year End process easier. These features include: using the Auto Calc Mass Select option, running the W2 Audit, and the Contract and Associated Pay Record Mass Delete.	SMS 2.0	HR / Payroll	Payroll
Cashing Out Time Off	Join us as we review the methods and tools that can be used to cash out time off.	SMS 2.0	HR / Payroll	Payroll
Retro Pay	Join us as we review the methods and tools that can be used to issue Retro Pay to employees.	SMS 2.0	HR / Payroll	Payroll
Payroll Corrections - Tips & Tricks	Join us for a review of efficient ways to process payroll corrections in SMS 2.0. We will cover the following scenarios: - Employee overpaid - Employee underpaid - Returning a garnishment to the employee - Deduction or Benefit for employee without pay - And more...	SMS 2.0	HR / Payroll	Payroll
Using Browse Filters and Views to Find Information Fast	Need information fast? Uncertain as to what report would work best to find what you think would be simple information? Participants will learn how to use Browse Views and Filters to find information with ease. Come see if Browse Views and Filters could work for you!	SMS 2.0	Hybrid	Filters
Skyward Mobile Access	Learn how Skyward Mobile Access can enhance the use of Skyward's software for your students, parents, teachers, employees, and administrators.	SMS 2.0	Hybrid	Mobile,SMS2.0
Data Mining for Staffing	What has the state given us, FTE-wise, for allocation? What are we currently using? How can I compare this in a quick and accurate way? This session will explore a custom Data Mining extract for certificated staffing, in order to compare with state apportionment/allocation data utilizing Microsoft Excel and/or Google Sheets. This presentation may be more suited to small to mid-size school districts (0-10,000 enrollment), or ESD audiences supporting districts of this size.	SMS 2.0	Hybrid	Financial Management Human Resources
Attendance Letters from Start to Finish - Part 1	This two part session begins with creating Custom Letters and stretches into the setup tasks which include setting up parameter codes (Attendance Types, Thresholds, and Date Ranges), and creating scheduled letter templates.	SMS 2.0	Student	Attendance Letters
Attendance Letters from Start to Finish - Part 2	This two part session begins with creating Custom Letters and stretches into the setup tasks which include setting up parameter codes (Attendance Types, Thresholds, and Date Ranges), and creating scheduled letter templates.	SMS 2.0	Student	Attendance Letters
2020-2021 Requirements for Special Education CEDARS Data Elements in Files I, K, and U (Part 1)	Come learn about the new changes to the P223H Special Education Enrollment Report and all the new Special Education CEDARS Data Elements. The first portion of our 2 hour session will focus on the P223H Report and then we'll move on to discuss the updated and new data elements in File K, plus look at the brand new file, Initial Evaluation and Eligibility Timelines - File U.	SMS 2.0	Student	CEDARS, P223H
2020-2021 Requirements for Special Education CEDARS Data Elements in Files I, K, and U (Part 2)	Come learn about the new changes to the P223H Special Education Enrollment Report and all the new Special Education CEDARS Data Elements. The first portion of our 2 hour session will focus on the P223H report and then we'll move on to discuss the updated and new data elements in File K, plus look at the brand new file, Initial Evaluation and Eligibility Timelines - File U.	SMS 2.0	Student	CEDARS, P223H
Current Scheduling - Tips & Tricks	This session will focus on basic scheduling functions. This session will include: - Adding or removing courses from a student's schedule - Creating Scheduling Groups for the Walk-in Scheduler - Using filters to find courses - Using the Walk-in	SMS 2.0	Student	Current Scheduling
Preparing your Curriculum Master for Qmlativ Migration	Curriculum Records are essential in connecting Courses to other features and modules in SMS 2.0, and even more so in Qmlativ. In this session, we'll discuss ways to identify Curriculum Records that need to be updated or removed, and look at some reports and utilities that will assist in the cleanup process to get your Curriculum Master ready for migration.	SMS 2.0	Student	Curriculum Master
Data Mining Made Easy	In this session, we will explore the setup of deductions and benefits. We'll also review considerations for moving forward in Qmlativ.	SMS 2.0	Student	Data Mining
Data Mining - Labels & Mail Merge (Student)	In this session, we will explore how we can take a data point from "over there" and combine it with another one "over here" to create just what we're looking for. You're limited only by your imagination (and Security) as to the data you can merge into labels and documents.	SMS 2.0	Student	Data Mining
Elementary Office Staff (3 hours) - Part 1	During this session, we will demonstrate how to manage Student Records from the perspective of Elementary Staff. We will look at Student Enrollment and the P223 Enrollment Report; Grading and how to run Report Cards, Health Records; how to troubleshoot and manage Family Information; and how to stay on top of daily Attendance. We will also cover some general tips and tricks that will help you do your job, including navigation, reporting, surveys, and student labels.	SMS 2.0	Student	Elementary Office Staff
Elementary Office Staff (3 hours) - Part 2	During this session, we will demonstrate how to manage Student Records from the perspective of Elementary Staff. We will look at Student Enrollment and P223-enrollment Report; Grading and how to run Report Cards, Health Records; how to troubleshoot and manage Family Information; and how to stay on top of daily Attendance. We will also cover some general tips and tricks that will help you do your job, including navigation, reporting, surveys, and student labels.	SMS 2.0	Student	Elementary Office Staff

Session	Description			
Elementary Office Staff (3 hours) - Part 3	During this session, we will demonstrate how to manage Student Records from the perspective of Elementary Staff. We will look at Student Enrollment and the P223 Enrollment Report; Grading and how to run Report Cards, Health Records; how to troubleshoot and manage Family Information; and how to stay on top of daily Attendance. We will also cover some general tips and tricks that will help you do your job, including navigation, reporting, surveys, and student labels.	SMS 2.0	Student	Elementary Office Staff
Family Maintenance and Reporting	This session will provide new users an overview of how to manipulate family information in the database (to include family splits and mergers). This session will cover: - Add, split or merge a family - Add a guardian - Locating siblings - Avoid duplicate entries - Family reports	SMS 2.0	Student	Family Maintenance
Future Scheduling - Using the Build Master Schedule Tools to Create a Master Schedule in SMS2.0	Now that your student requests are entered for next year, it is time to build your Master Schedule in SMS 2.0. During this session, I'll demonstrate how to use the Interactive Scheduling Board to analyze student requests and find the best placement for classes in the Master Schedule, and use the Master Schedule Builder to complete the process of building your Master Schedule.	SMS 2.0	Student	Future Scheduling
Future Scheduling with the Auto Scheduler	This session will discuss how to use the Auto Scheduler with Imperative, Pseudo, and Actual runs to schedule your students more effectively. The session will cover: - Overview of the Auto Scheduler range screen - Imperative vs. Pseudo vs. Actual - Interpret the Scheduling Run Analysis screen - Interpret the Student Conflict Detail Report	SMS 2.0	Student	Future Scheduling
Entering Transfer Grades for High School Transcript	This session is for high school personnel that enter a transfer student's previous high school transcripts into Skyward. Starting with entering the entry/withdrawal dates from previous schools, and how to enter each course onto your high school transcript.	SMS 2.0	Student	Grading
Message Center & Auto Email Communication (SMS 2.0)	During this session I'll show you how to use Message Center to communicate with your students and their guardians, create a message, including posting and sending options, visualize how messages appear in Family/Student Access, and how to configure automated emails.	SMS 2.0	Student	Message Center and Auto Email
New Student Online Enrollment	This session will cover the following: NSOE Parent Portal; Account Creation, New Student Application Completion, Custom Forms; Data Submission, Portal Users Area, NSOE Application Approval Overview, Student Record Creation via Application Approval. We will also discuss lessons learned from real district implementations.	SMS 2.0	Student	NSOE
Processing Lists and Practical Uses	In this session, you'll learn about Processing Lists. I'll provide an overview of how a Processing List works, demonstrate how to create a CSV file using Skyward and Excel to import into a Processing List, create a Processing List from Skyward Browse Screens, how to refine your list by adding or deleting names and scenarios that show what is possible. This session will inspire creative thinking about ways to utilize this option and save time! Think of a Processing List as another set of ranges or parameters to help you capture just the right group of data to report on.	SMS 2.0	Student	Processing Lists
Intermediate Processing Lists - Refining Your Data	Participants in this session will learn about Processing Lists. Overview of how a Processing List works, demonstration on how to create a CSV file using Skyward and Excel to import into a Processing List, create a Processing List from Skyward Browse Screens, how to refine your list by adding or deleting names and scenarios that show what is possible and inspire creative thinking about ways to utilize this option and save time! Think of a processing list as another set of ranges or parameters to help you capture just the right group to report data about.	SMS 2.0	Student	Processing Lists
Creating Processing Lists Using Data Mining	In this session I'll demonstrate how to create a Processing List in Data Mining, how to manually create one, or import to create one, and then use them to run Data Mining and Other Student Management Reports. You'll see that once you know how to create a Processing List, using them as import into other reports works the same.	SMS 2.0	Student	Processing Lists
Top Benefits of the Import (Writeback) from IEPOnline	Do you already use IEP Online or are you thinking about it? Did you know that WSIPC's custom integration not only sends data from Skyward to IEP Online, but can also import data from IEP Online to Skyward? Come explore the top benefits of implementing the Writeback at your district.	SMS 2.0	Student	Special Education
Student Management for Beginners	TBD	SMS 2.0	Student	Student Management
Creating & Maintaining Section 504 Records	This session will guide users through creating and maintaining a student's Section 504 Record in the Section 504 module.	SMS 2.0	Student	
Help Make Your School Safer	Steven W. Anderson is a renowned educational influencer (@web20classroom on Twitter), author and a former teacher and district tech director. He talks student safety and introduces Intrado Safety Shield, a cutting-edge complete digital safety platform that helps bridge the gap between schools and first responders.	Other	Sponsored Session	
Come Take a Fun-filled Tour of the VEBA Factory!	Health Reimbursement Arrangements (HRAs) can't compare to a fine piece of chocolate, but our easy administration system will leave a pretty good taste in your mouth. After a quick overview of the VEBA Plan, we'll let you in on a couple of factory upgrades that are cranking out even more delicious goodness these days. Of course, we're talking about submitting enrollments, contributions, status changes, and secure messages.	Other	Sponsored Session
